

No. 2(a)/2385

From

B. M. Sen, Esq., M.A.(Cantab.), I.E.S.
Offg. Principal, Presidency College.

To

The Director of Public Instruction, Bengal.

Dated Calcutta, the 14th September 1931.

Sir,

With reference to your letter No. 7124 A dated the 10th September 1931, I have the honour to forward the following figures for your information :-

- i. Number of Professors and Lecturers in Mathematics.....6
ii. Number of students

Intermediate	283
B.A. & B.Sc (Pass)	163
" (Honours)	47
Post-Graduate (in cooperation with the University)	36

- iii. I am prepared to undertake not more than 3 hours' work per week, but I did not wish to disturb the arrangements at the middle of a term when I joined my present post.

I take the liberty of pointing out that the question of the staff of the Presidency College was thoroughly gone into by the Presidency College Reorganisation Committee which met in 1925 (Appendix IV, Second Report). Among the recommendations of the Committee was the creation of a sixth teaching post in the Mathematics Department (Para 16, page 7 of the Second Ad-Interim Report). The reasons for the increased staff have not ceased to exist.

I may add that my appointment to ~~my~~ present post does not materially affect the position, as I can offer only a small help towards the teaching work.

If, however, the Government decides to do away ~~and~~ with the post, I hope the arrangement will be one of temporary abeyance only.

I have the honour to be,

Sir,

Your most obedient servant,

B. M. Sen
Principal, Presidency College
