No. 2067, dated Calcutta, the 11 June 1873.

From — H.J.S. Cotton, Esq., Offg. Under-Secretary to the Government of Bengal,  
To — The Director of Public Instruction.

The Lieutenant-Governor has understood that Mr. Pedler, the newly arrived Science Professor at the Presidency College, may have suggestions to offer regarding the best mode of preparing the laboratory, science lecture-room and preparation-room of the new Presidency College. If this be the case, I am to ask that the Principal and Mr. Pedler will put themselves in communication with the Engineer in charge of the new building, and make through yourself to the Public WOrks Secretary such proposals as may be suitable for fitting up the laboratory and lecture-room, making small laboratories for students, setting apart a preparation-room, laying on water and other matters.
